

8(a) Certified, WOSB, EDWOSB

AVESI, Inc. is an 8(a) Certified, Woman-Owned Small Business specializing in radiation protection programs, environmental services, and professional safety support.

Since our establishment in 2004, AVESI has matured into a highly regarded small business through strong client relationships in government and private sectors. Our knowledgeable/experienced staff, armed with AVESI's service-oriented directives, have extended our reach through multiple US regions in the Environmental Industry. AVESI is headquartered in Panama City Beach, FL maintaining project field offices in step with our customer locations with our largest footprint being in St Louis, MO.

AVESI professionals provide consulting services for environmental investigations, construction/remediation, safety auditing, radiological investigation/remediation reporting, and more. With our motto being "We have always been about service!", AVESI has remained determined to consistently provide quality professional services to our clients from beginning to end and we intend to maintain this integrity through each opportunity going forward.

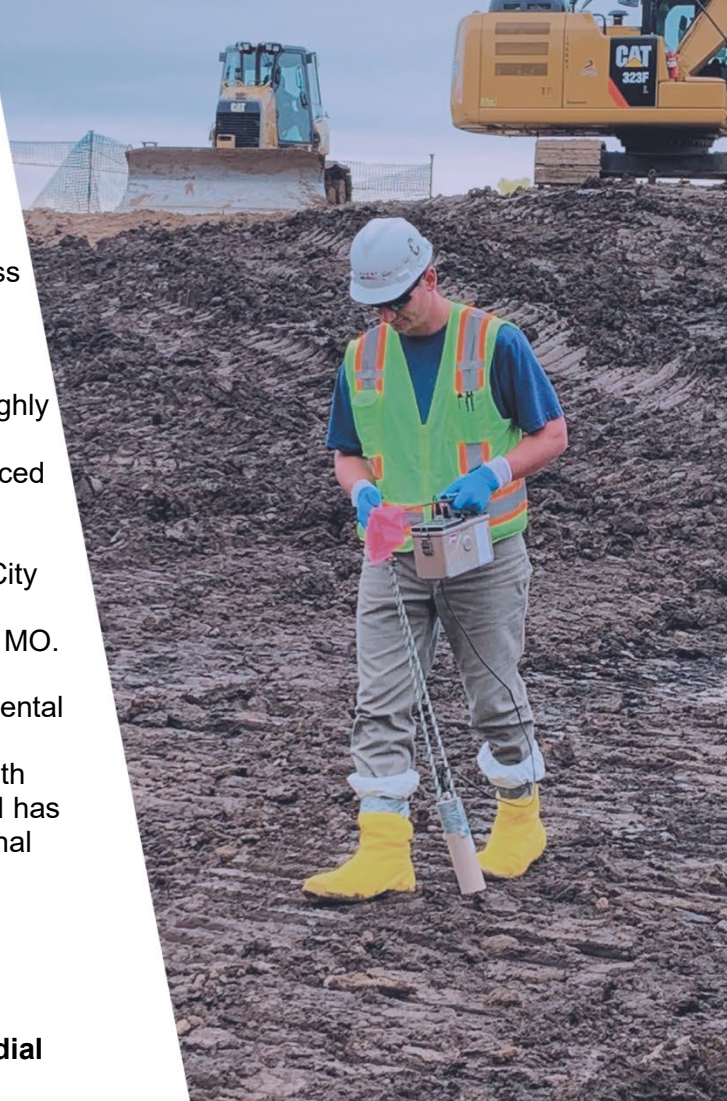

CORE COMPETENCIES

- ❖ **Comprehensive Radiation Protection Programs**
- ❖ **Demonstrated FUSRAP (Formerly Utilized Sites Remedial Action Program) Experience**
- ❖ **Firing/Weapons Testing Range Depleted Uranium Remediation**
- ❖ **Dose Reconstruction and Dose Assessments**
- ❖ **Human Health Risk Assessments**
- ❖ **Gamma Walkover Surveys/Excavation Guidance**
- ❖ **Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM) final status survey**
- ❖ **Multi-Agency Radiation Survey and Assessment of Materials and Equipment Manual (MARSAME) final status survey**
- ❖ **ArcView Geographic Information System (GIS) mapping**
- ❖ **Safety Inspections and Auditing of Facilities**
- ❖ **Specialized Technical Staffing**
- ❖ **Field Laboratory Set Up and Support**
- ❖ **OSHA training provider**
- ❖ **Environmental Technical Writing**
- ❖ **Vapor Intrusion Sampling, Investigation and Modeling**
- ❖ **Hazard, Toxic and Radioactive Wastes (HTRW) soil/water/air sampling**
- ❖ **Site Characterizations**

RADIATION PROTECTION SERVICES

AVESI, Inc. maintains a radioactive material license and specializes in radiation health physics to provide our clients a one-stop shop for radiological protection services. Our development and oversight of a comprehensive radiation protection program may include procedure development, program audits, personnel training, and radiological controls for source receipt and handling, as well as dosimetry support. We are prepared to assist our clients in the set-up, and operation of gamma spectroscopy laboratory in support of remediation activities demanding short turnaround times for remediation guidance.

AVESI has a comprehensive inventory of radiological instrumentation in order to offer a full-service experience. We are able to provide dose reconstruction and risk assessment associated with probability of causations. AVESI has demonstrated extensive experience in the remediation of radioactive waste services including site characterization, sampling, laboratory analyses and data management, excavation support, worker protection, contamination control, shipping and disposal support, excavation guiding gamma radiation walkover surveys along with final status surveys (MARSSIM/MARSAME).

AVESI, Inc. is a leading provider of comprehensive radiological remediation services in the United States Army Corps of Engineers (USACE) Formerly Utilized Sites Remedial Action Program (FUSRAP).

PROFESSIONAL SAFETY SUPPORT

The AVESI consulting capabilities include an array of safety support services such as facility safety audits, regulatory compliance inspections and auditing, risk assessment and risk management support, onsite regulatory training, and Occupational Safety and Health Administration (OSHA) compliance. We understand the unique technical challenges and regulatory framework required to execute projects safely and effectively.

ENVIRONMENTAL SERVICES

The AVESI environmental team is comprised of engineers, scientists, geologists, data managers, technical writers, data analysts and environmental professionals prepared to support your Hazardous, Toxic and Radioactive Waste (HTRW) challenges. We serve our government and private sector clients focusing on site characterization, risk assessment, and mitigation for the development of practical remedies.
