AVESI FUSRAP TEAM

Big thanks to Matt Roofe for sending us these awesome pictures of some of the AVESI HGL FUSRAP Team. This picture to the left shows Mr. Roofe in an excavation at the Gunther Salt Domes.

In the picture to the right, Jake Boxdorfer is marking soil sample locations at the North County site in St. Louis.

Thank you AVESI FUSRAP Team! We appreciate your hard work and dedication! Please keep the pictures coming! We love to brag on our employees 😊

AVESI CELEBRATES SLDS SITE PERFECT SAFETY RECORD AWARD

The National Safety Council awarded the FUSRAP SLDS site with the Perfect Record Award, which recognizes facilities that have completed a 1 year of operation without incurring an occupational injury or illness.

AVESI is a big part of the safety at the SLDS site with Mike Dekeyser and Matt Roofe performing heat stress monitoring, drafting job safety analyses, and radiation work permits for day to day tasks. This award also places the SLDS site in the running for an award over all U.S. Army Corps of Engineers (USACE) Mississippi valley division. Congrats SLDS and great work AVESI SLDS Team for making this possible!
ANGER: JUST ONE LETTER SHORT OF DANGER

Everyone has an opinion and differences in opinion can easily cause outbursts of anger in the workplace. If you have angry workers in your department or you yourself are angry, you may end up reporting more injuries on the job. A recent study by the Annals of Family Medicine found that high levels of anger increase the risk of injury. Angry people are more likely to sustain injuries serious enough to require emergency medical care, and the risk is higher for men than women, says lead author Daniel Vinson of the University of Missouri.

The study, in the Annals of Family Medicine, found that nearly 32% of all the patients reported being irritable just before they were injured, 18% reported being angry and 13% reported being hostile. Anger more than quadrupled a person's odds of being injured, while being hostile increased those odds sixfold. For men, Vinson says, the link was particularly clear.

Another study that followed 100 drivers for two weeks linked episodes of anger with "near accidents". Let's get home safely to our families!...

AVESI IS GROWING!

AVESI, Inc. is continually expanding and we are so fortunate to announce our recent full-time and intern new hires. Please welcome two new Senior Radiation Protection Technicians, Kevin Howe and Jeston Miller, to the HGL FUSRAP Team in St. Louis. AVESI would also like to welcome two new Environmental Safety & Health II Technicians, Avery Linnemann and Matthew Passig, supporting the Leidos Team in St. Louis. We are so proud to welcome 9 employees to our 2020 Intern Program!

Dylan Bushman, Jared King, Dylan Sheets, Caleb Hansen and Rachel Sneed are Field Student Interns supporting our Leidos Team in St. Louis. Bailey Connor and Allison Young are Student Interns supporting the Leidos Laboratory in St. Louis. The Student Interns supporting the Leidos Field Team in Iowa include Kaylee Dameron and Jeren Glosser.

What an honor to have such growth! Please be on the lookout for AVESI newbies and make them feel welcome!
PROPOSAL UPDATES

In September 2019, AVESI, Inc. submitted pricing and a commitment letter to team with APTIM on their proposal for the Decommissioning & Disposal of the SM-1 Nuclear Reactor Facility at Fort Belvoir, Virginia. APTIM provided a Best and Final Offer and resubmitted. This project has not yet been awarded.

In December 2019, APTIM requested a bid to support them on the loading, transport, dismantling and disposal of the Surface Ship Support Barge (SSSB). The SSSB was used by the Navy to service reactors and supporting refueling of nuclear-powered surface combatants at Newport News Shipbuilding. APTIM was recently awarded this project and we are standing by to see if we can assist them based on our submittals.

In February 2020, AVESI Inc. signed a teaming agreement with HGL/APTIM to provide radiological support services for the USACE Luckey rebid in Luckey OH. The team is working on the request for proposal as the release date is anticipated any day. This project represents $100M over a 10-year period. We hope to see an award by the end of 2020.

In March 2020, AVESI, Inc. signed a teaming agreement with ATI, Inc. in order to pursue a Pre-placed Remedial Action Contract (PRAC) out of the Omaha District for the USACE. The Request for Proposal for work on the I-270 bank remediation in St. Louis, MO was released in early June. The RFP will ask our team to propose on excavating over 30,000 cubic yards of soil on a bank adjacent to I-270 and have the area restored with backfill by the end of the year. This will be a big way to wrap up 2020!

CHECK OUT OUR WEBSITE!

Our website https://avesi-usa.com/ has been updated with a new employee portal, resume submittal page, corporate ownership changes, project changes, etc.

We’re excited to provide more functionality for our current and future employees through the career’s page with resume submittal and the employee portal, where we soon hope to be able to securely provide all employee’s with timesheets, tax information, training, etc.

Feel free to check it out!
Happy Mother’s Day and Happy Father’s Day to all! We hope everyone made sure to celebrate the wonderful mothers and fathers out there!! We hope to include some personal photos of our employees celebrating the holidays in each Newsletter, so do not be shy! Every Newsletter will also include an employee recognition section as well as our employee anniversaries!

**AVESI would like to recognize DEVON KARBACH for working with the team in IA for 8 weeks during the last few months! We appreciate you stepping up!**
